Specification

1. The disclosure is objected to because of the following informalities:

On page 6 of the Specification, at line 4, it appears that the word "L-methionie" is the word "L-methionine" misspelled.

Appropriate correction is required.

Claim Objections

2. Claim 9 is objected to because of the following informalities:

In line 2 of claim 9, it appears that the word "Olanzipine" is the word "olanzapine" misspelled.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8, 10, 12, 14-16, and 18-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent No. 04-096996 (Abstract provided).

The Japanese Patent teaches a mixture of a suitable ratio of calcium carbonate powder (considered to read upon the terms "limestone" and "activated limestone") and activated carbon powder. The mixture may also contain additives such as fungicides, biocides, herbicides and artificially synthesized vegetable hormones and nutrients.

In view of these teachings, the Japanese Patent anticipates claims 1-8, 10, 12, 14-16, and 18-27.

Art Unit: 1755

5. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being in public use or on sale in this country, more than a year prior to the date of application for patent in the United States by the "Chaser" printed publication.

"Chaser" teaches hangover pills comprising activated calcium carbonate and vegetable carbon. The pills also contain vitamin B2. The pills are to be administered in the amount of 2 caplets every two to three hours (or every four or five drinks). See the last two pages of the "Chaser" printed publication.

The claimed invention appears to be the same composition as disclosed in the "Chaser" printed publication, which is sold by Innovation Ventures L.L.C., doing business as "Living Essentials". The article with a publication date of 2001 teaches that "Chaser" has been taken for 5 years, therefore the product has been in public use or on sale since 1996.

6. Claims 1-8 and 10-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Sport-Horse Supreme (printed publication).

Sport-Horse Supreme teaches a vitamin mineral supplement for sport horses. The supplement comprises, inter alia, vitamin B-12, thiamine (vitamin B-1), folic acid, calcium carbonate (considered to read upon "limestone" and "activated limestone"), and activated charcoal. See pages 1-3 of Sport-Horse Supreme.

In view of these teachings, Sport-Horse Supreme anticipates claims 1-8 and 10-27.

Conclusion

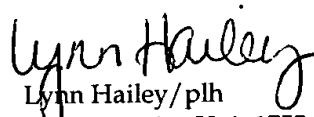

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
